

REPORT

Regarding Waste collection and treatment at Cat Lai port

I. Partner in waste collection and treatment:

1. Hazardous waste disposal partner

- Viet Uc JSC - A licensed company for hazardous waste management issued by the Ministry of Natural Resources and Environment.

2. Units transporting hazardous wastes for treatment

- District 1 Public Services Co., Ltd

3. Units collecting and treating daily-life waste

- District 2 Public Services Co., Ltd

4. Units transporting waste from ships and sorting waste before disposal

- 22 -12 JSC.

II. Equipment and facilities for receiving and transporting waste from ships

- Mainly using public waste bins to collect waste from ships when transporting to storage, then using forklifts for loading/unloading.

- Currently at Cat Lai port, there are 20 waste collection points and a hazardous waste storage, the trash bins is divided into 2 categories: Blue bins contain household waste, orange bins contain hazardous waste; all bins were labeled with waste codes and warning signs

- The office area is equipped with garbage separation bins (3 compartments) with signs and instructions for sorting garbage at source.
