

Welcome to Saigon Newport Logistics

***PROJECT CARGO***

# Our Introduction

Saigon Newport Logistics Center - Saigon Newport Logistics (SNPL) was established to execute the second pillar - the Logistics services. Our functions are the integrated and unified management of Logistics activities and service quality of Saigon Newport Corporation to provide comprehensive logistics services and solutions to meet all customers' needs.

With a nationwide infrastructure system, a network and capacity for water and land transport, warehouse system, advanced management technology, .etc. With a system of agents in more than 50 countries worldwide, a team of experienced and dedicated staff, SNPL believes in providing customers with complete services and many utilities.

SNPL always cooperates with shipping lines and logistics partners to bring customers, especially import-export customers, logistics solutions with high added value, helping to save costs and increase reliability, competition of Vietnamese goods in domestic and foreign markets.

Logistics activities of SNPL have practical significance, flexibly and dynamically connecting the entire Logistics system of Saigon Newport Corporation, affirming the success of the development strategy of Saigon Newport Corporation.

*Teamwork is at the heart of  
great achievement*

*-John C. Maxwell*
